***TB 9-850-15**SFUND RECORDS CTR
48770**WAR DEPARTMENT TECHNICAL BULLETIN****USE OF DRY-CLEANING SOLVENT**

*Ref: TM 9-850 Cleaning, Preserving, Lubricating, and Welding Materials,
and Similar Items Issued by the Ordnance Department,
18 April 1942.*

War Department, Washington 25, D. C., 10 July 1944

1. During maintenance operations, dry-cleaning solvent should be used for the general cleaning of all automotive, artillery, and other equipment parts which may be coated with oil or grease. However, Diesel fuel may be used as a substitute. The use of gasoline for cleaning is a fire hazard, and leaded fuels may cause skin irritations.

CAUTION: Avoid getting dry-cleaning solvent or Diesel fuel on rubber tires, rubber hose, or electric wires. Rubber tires, rubber hose, and electric wires should be washed with soap solution (1/4 pound of soap chips to 1 gallon of water) or in the absence of soap, water alone.

2. Dry-cleaning solvent is an item of Quartermaster issue.

[A.G. 300.5 (Jul 44)]
[O.O. 300.5/6730]

*This TB supersedes TB 9-850-4, 30 October 1942.

*TB 9-850-13 and all following TB's of the 9-850 series will be published as WDTB's. TB 850-1 through 850-12 were published as OFSTB's which remain in effect until specifically superseded or canceled. Any WDTB of this series bearing a subnumber 1 through 12 will be a reprint of the contents of the corresponding OFSTB and no initial distribution of such reprint will be made to personnel possessing the OFSTB.
